

(Name)
Communication Passport

**A book about me
 (date)**

**Please read this book with me
 and learn how I communicate**

A communication passport helps people to understand _____'s needs and how he / she communicates. It is owned by _____, and should be read together with her / him.

It should always be accessible to _____, and should be carried in his / her bag at all times.

When _____ meets new people or goes to new places, the passport should be read with her / him. This could initially be done a few times during the day, to help to get to know one another.

In situations where _____ is moving, the passport should also be used in this way.

If _____ is ever admitted to hospital, it is very important this book goes with her / him. This will help nursing staff to get know _____ and understand her / his needs.

Personal / confidential information may often be admitted. This is a book that is designed to be shared with others, and _____ may want to keep some things private.

Remember – a communication passport needs to be reviewed and kept up to date. A person's life is not static but is constantly changing! A good time to do this might be at annual review meetings.
